

Policy & Systems Change Workgroup

Scope of Work and Objectives

July 2019-June 2020

Scope of Work:

The policy and system change workgroup supports RIRI's larger goals to 1) assist in the adoption of trauma-informed practices into existing systems and 2) facilitate interorganizational collaboration and resource development. Policy and systems change work requires a patience and persistence as we work towards making our long-term vision a reality.

Team Objectives:

- Research existing trauma-informed and trauma-responsive model policies & best practices for healthcare and social service agencies
- Support the KGBSD in adopting formal top-down trauma-informed policies. (District Policy Committee 2nd/4th Thursday of month)
- Share coalition and agency data/assessments using the RIRI website. Promote this centralized platform of sharing community data to other coalitions workgroup members participate on.
- Promote parenting/caregiver classes available in community and facilitate interorganizational collaboration between entities providing parenting services.
